Trust The Water Experts®

Better Water Means Better Living

Discover all the benefits of a cleaner, easier way of living with the Culligan Super S® Whole House Water Filters.

Whether your problem is Iron, Hydrogen Sulfide or both, Culligan's *Super S* filtration system is the solution.

Tough on iron water.

If there's iron in your water, you don't need us to tell you how bad a problem it is. Ugly rust stains on your clothes, fixtures, and dishes remind you everyday.

Culligan's *Super S* filter takes care of all that. Through an exclusive Culligan process, iron is oxidized and then filtered, leaving you with fresh, clear water for bathing cleaning and washing. And since the *Super S* utilizes this unique air compression process, the need for regenerants is reduced. Simple backwashing saves you money on chemicals and water.

Stops that "rotten egg odor."

Hydrogen sulfide.* If you have it, you know it. It's what causes that "rotten egg" odor in your water. And it doesn't look any better than it smells. Hydrogen sulfide leaves black stains on your laundry and bathroom fixtures. Even worse, it can cause damage to your pipes, leading to costly plumbing repairs.

Culligan's *Super S* filter virtually eliminates these problems using a patented filtration process that removes hydrogen sulfide from your water.** So you won't have to hold your nose every time you turn on the tap. Plus, the only regenerant you'll need is ordinary household bleach. So you won't be bothered with the expense and hassle of other chemicals. That will save you time and money.

Quality. Convenience. Economy.

What else would you expect from Culligan?

With Culligan's *Super S* filter, you can be sure you're getting one of the most dependable, convenient, advanced filters on the market today.

It uses only 10 inches of floor space, about the same as a floor lamp. And it will fit almost any home, whether you're on a private well or a public water system. And unlike conventional water systems, the *Super S* filter doesn't use messy, expensive chemicals to regenerate, nor does it require as much backwashing. So you'll save on maintenance and your water bill!

Exclusive Culligan's Super S[®] Design Technology

Culligan's *Super S* Water Filters are built with state-of-the-art features to deliver the finest conditioned water to your entire family.

The full-flow one inch system meets plumbing standards and allows you to run numerous water sources simultaneously without lowering the flow rate or pressure.

Bypass the System

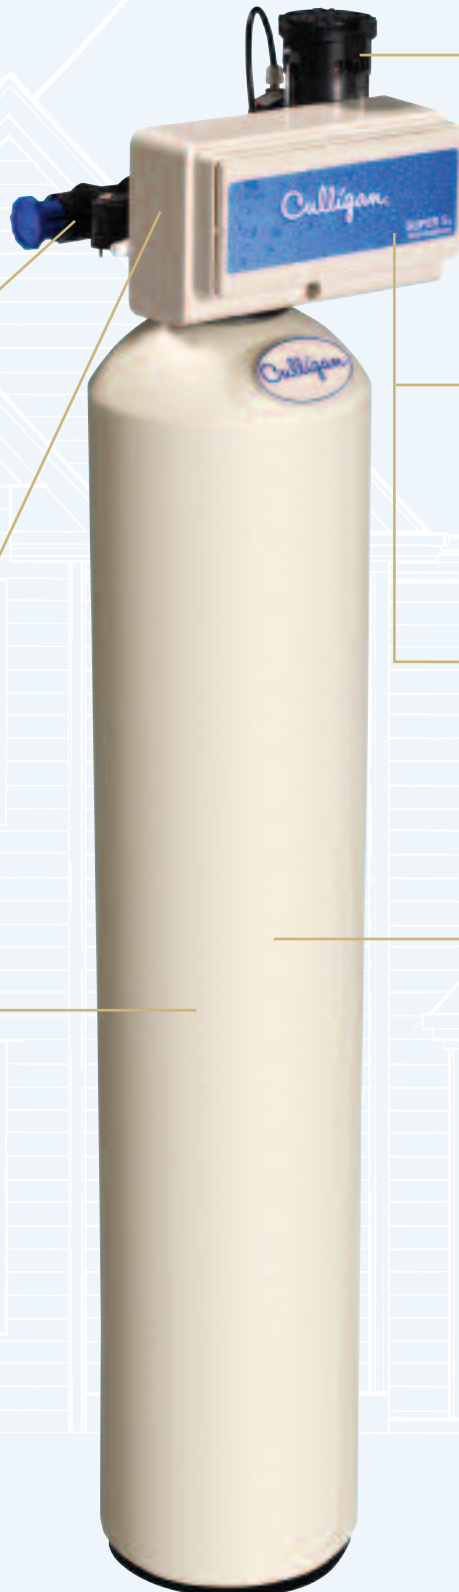

The one inch Cul-Flo-Valv[®] lets you bypass the system for uses not requiring filtered water—such as watering the lawn—without losing pressure.

Reliable Valve

Exclusive, non-corrosive control valve that directs water flow during service and reconditioning. Low friction piston and seal services defy problem water.

Unique Multi-layer Filter Media

The media in the filter tank acts as an insoluble catalyst to enhance the reaction between the oxygen and iron.

Super S System

Air compressor is key to the aeration process which oxidizes the dissolved iron, and hydrogen sulfide. On/off times adjustable to raw water characteristics.

Customized to Fit Your Life

Culligan electric timer automatically regulates all cycles - providing customized service for your individual needs.

Worry-free Water for Everyone

Guest Cycle[™] recharge provides an extra supply of filtered water when there are more people than normal in the home.

Culligan Exclusive Quadra-Hull[™] Tank With Limited Lifetime Warranty¹

Designed to provide the highest protection in the industry, our exclusive Quadra-Hull[™] tank has four layers of construction.

¹ The *Quadra-Hull* tank is backed by the *Culligan* Limited Lifetime Warranty. The terms of product warranties vary and may be modified from time to time. Culligan will provide a copy of same upon request.
